_____

## About me
I am a FullStack dev focused in FrontEnd, my professional goal is to work in IT companies, as a Front End or FullStack developer.

## Education
### No Country
3 projects in real team project simulations, in frontend role, scrum methodology, with backend, UX/UI, tester, PM, PL roles. Bigest challenges: implement a  grid calendar with a modal for each event, solve asynchronous UI update problems, to be nexus with backend .

### Coderhouse                                                                                                    2021- 2022
Full-Stack Web Developer with React  MERN stack courses.
 Apps Development,  React Native with Expo course.

### Buenos Aires University                                                                            2016
Industrial Engineering at Universidad de Buenos Aires. 33 approved courses until 2016.

## Experience
**Frontend Developer at Be-Code**                                                        10/2024 - 02/2025
Unpaid internship, implementing components with logic, drag and drop.

### Mentor in Apps Development Course in Coderhouse                2022-2023
- Administrative tasks, correct practical work.
- Answer technical questions about Javascript, React, React Native, Redux.

### Frontend Developer - Freelance                                                          2021- Today
- Landing pages. React or Next apps in teams or by myself, some of them obtained in Coderhouse's Top 10 program for outstanding students.

## Soft Skills
